

FernoTrac™ Traction Splints

Movement of patients with long-bone fractures of the lower extremities creates a painful situation for those in our care. **FernoTrac™ Traction Splints** provide **mechanical traction to relieve pain and reduce the possibility of vascular and nerve damage** in patients with these types of fractures.

- Mechanical traction relieves pain and reduces the risk of further injury
- All straps have simple, step-by-step instructions sewn directly onto them
- Available in adult and pediatric sizes, or as a kit

FernoTrac™ Traction Splints

Features

- **Provides mechanical traction** to relieve pain and reduce the possibility of further vascular and nerve damage
- **Wide elastic support straps** maintain the injured leg within the frame of the splint, helping to provide in-line traction
- **Simple, step-by-step instructions** are sewn directly on the straps
- **Length adjustments** can be made by loosening the knurled sleeves on each side of the tubular aluminum frame
- **Low-profile ischial pad** permits splint to be applied with minimum movement of the patient's leg
- **Heel stand folds flat** for storage and instantly locks into place for support of the injured leg
- **Simple adjustable wrap-around ankle hitch** designed to allow EMTs to check pedal pulses
- **Full-length yellow nylon carrying case** keeps splint sanitary and ready for use
- Available in adult and pediatric sizes, or as a kit
